

A background image of a city street with modern glass skyscrapers and older brick buildings under a cloudy sky. A large blue geometric shape is overlaid on the right side of the image.

AHD/XVI SOLUTION SELECTION

2018 Ver.1

HANGZHOU JUFENG TECHNOLOGY CO.,LTD.

www.jftech.com

HANGZHOU JUFENG TECHNOLOGY CO.,LTD (JF TECH) is a high-tech company which was established in 2008, focused on “R&D”, with production, sales, service all provided, JF TECH devotes itself to offer high-quality, best price products and “point to point “best service. JF TECH is a leading video surveillance provider in China, located in Hangzhou. It has its own branch company & office in most of main domestic cities.

JF TECH focus on video surveillance, encoding, decoding, intelligent analysis, cloud storage etc. , meanwhile, we explore new technology, new solution continuously. With dedicated IP&AHD technology, together with excellent surveillance software platform,etc., JF TECH solution is widely used in many fields, such as Intelligent-transportation, Safe city, Mobile surveillance, community surveillance, Internet of things.

HANGZHOU JUFENG
TECHNOLOGY CO.,LTD

A leading video surveillance provider in China

Video Surveillance Leader

- new technology, new solution continuously
- high-quality, best price
- IP&AHD technology, together with excellent surveillance software platform,etc.

Camera Technical Features

Starlight: Under the environment of starlight illumination without auxiliary light source, it can get clear image, the minimum illumination up to 0.0001lux. (Ordinary low illumination, starlight low illumination)

Day/night switch: In the dim environment, the camera can switch from color mode to black /white mode , and improve the light sensitivity to make the image clearly visible. (color mode, black and white mode)

WDR:It can balance the high brightness region and low brightness region to output a clear image.

Defogging: The fog and rainy days will seriously affect the image effect of the cameras, but the cameras which support defogging function can restore the clear image through the fog.

Backlight Compensation:It can compensate for the defect that the main part of the image is dark in the background of intense light, lift the brightness of the dark main part to identify the main port better.

Privacy Mask:It can add and set the mask region in the image flexibly to avoid the leakage of sensitive information in the image and protect the security of users.

Rotate mode: In the narrow monitoring environment , the ordinary camera can only get part of the scene, both sides of the monitoring space are ignored, when the camera open corridor mode, it will change the picture ratio on the screen and get a better monitoring scene.

3D noise reduction: 3D noise reduction (3D DNR) surveillance cameras can find the noise position and make gain control by comparing, screening the image of before and after frame rate. The 3D noise reduction of the camera can reduce the weak image signal noise interference, image noise will be significantly reduced, the image will be more thorough, which shows a relatively pure and exquisite picture.

Intelligent Video: Support the intelligent video function, including Tripwire, Intrusion, Scene Change, Abandoned and Missing Object.

Camera Technical Features

H.265+ : H265+ is a video coding technology which optimized on the base of H265. Only 2.5G for one day recording.

H.264+ : H264+ is a video coding technology which optimized on the base of H264. Only 1G for one night recording.

6KV anti-thunder: Thunderstorm weather, outdoor electricity equipment is vulnerable to suffer the lightning strike. In order to avoid being damaged by thunderstorm, the camera must have a good anti-thunderstorm protection measures. 6KV anti-thunderstorm protection technology can effectively resist the strong lightning stroke and reduce the probability of the lightning strike in the process of the use of the camera.

±10% power supply voltage: when the camera is working, it's ok for a certain power supply voltage fluctuations, our company adopt the advanced voltage rectifier technology which can be up to ±10%

POE: JFtech cameras support Power over Ethernet, it can save the cost of power adapter, the power line and the switch.

Upgrade online:The devices can automatically identify whether there is a firmware update on the server and remind the user to upgrade the latest firmware when it is online.

DSS:New DSS architecture, show the image quickly, MD5+ private algorithm, service cluster+ load balancing, more security because of the double encryption, more stable performance, and the connectivity rate is 100%.

XVI Control: XVI Control is a new coaxial transmission protocol, highly compatible the specific transmission protocol of AHD, TVI and CVI, and support the functions of XVI control, Image enhance, XVI upgrade and Sensor Cfg.

Coaxial Control

Coaxial Update

Image enhancement

Three-axis adjustable bracket: Bullet camera comes with three-axis adjustable bracket; the angle can be freely adjusted and easily installed. At the same time it could save the cost of bracket.

IP66 / IP67: Waterproof design, high reliability.

A nighttime photograph of a modern cityscape. The image features several tall buildings with illuminated windows, creating a grid of light. In the foreground, a curved walkway or bridge structure is visible, also illuminated. The sky is a deep blue, suggesting dusk or dawn. A semi-transparent pink rectangular box is overlaid on the center of the image, containing white text.

XVI Camera

Support Starlight

1080P/720P Series

Support XVI/AHD/TVI/CVI

Provide superior image quality at night

What's XVI?

XVI is also known as AXVI, a coaxial transmission protocol, which is newly developed by JF TECH. XVI is compatible with AHD and TVI protocols, and also has unique features which make it stand out from the competition.

The core feature of XVI

Coaxial Control: One coaxial cable can transfer video and command signal at the same time. DVR can control XVI camera directly, which is convenient to debug and maintain the project.

Coaxial Update: Transfer updates date by coaxial cable

Update XVI by DVR directly, make firmware customization more easier, no need to return to factory, which is helpful to save your time and energy.

Need professional maintenance staff, require much time and effort.

Remote operate, easier and quicker.

Image enhancement

JF TECH design image enhancement and noise reduction unit in XM310、XM320、XM330 and other ISP Independent chip. Images can show remarkable features when combining XVI with JF TECH DVR.

Video Recorder Technical Features

 <p>1080N</p> <p>1080N</p> <p>Latest format 1080N(Resolution:960*1080), connect with 1080P front-end, cost-effective with high performance solution.</p>	 <p>AHD/TVI/CVI/CVBS/IP Five in one</p> <p>Five in one video recorder, support AHD/TVI/CVI/CVBS/Network five signal connecting, to meet different CCTV requirements.</p>
 <p>H.264+</p> <p>H.264+</p> <p>Compare with traditional H.264, H.264+ encoding technology greatly lower the video bitrate to save implementation cost.</p>	 <p>Onvif</p> <p>Onvif standard define the general protocol for the information exchange of network video device, including device search/real time video/audio/metadata and control information etc.</p>

A city street scene with a green overlay containing text. The background shows a street with buildings, trees, and cars. A prominent building in the background has a sign that says "MODELL'S". The green overlay is semi-transparent and contains the following text:

Consumption		<15W(Without HDD)		<15W(Without HDD)	
Dimension		440mm(L)* 400.5mm(W)* 60mm(H)		443mm(L)*427.5mm(W)*92mm(H)	

The background image shows a multi-level shopping mall. In the foreground, there are several escalators with blue handrails and metal railings. People are seen walking on the escalators and on the upper levels. The floor is made of light-colored tiles with dark square accents. A green semi-transparent overlay covers the center of the image, containing white text. The text lists the features of the 4MP/5MP Lite Series camera system.

4MP/5MP Lite Series

Support XVI/AHD/TVI/CVI/CVBS/IP Self-adaptive

Up to 5MP@11fps,4MP@15fps

Support Multi-Language

Support intelligent function

4MP/5MP Lite Series

Software

Mobile Phone Access

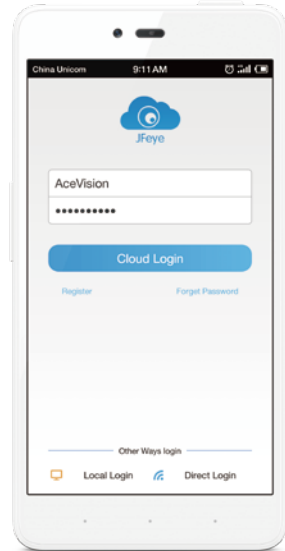

Mobile Phone Access
Device remote access through JFeye mobile client.

ios

Android

Web Access

Google Chrome、 Safari、 Firefox、
IE7.....Support current main
browsers.

Google Chrome

Safari

Firefox

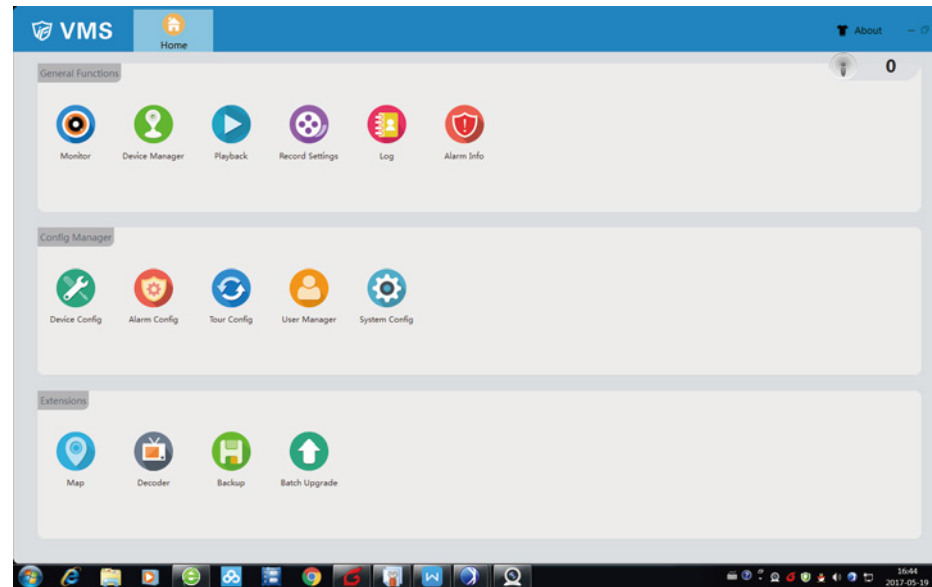

IE browser

Software

VMS Client Access

Network integrate management platform VMS support device centralized management, remote access, support alarm/video setup, PTZ control etc.

Software

Cloud Platform

A key to achieve remote access through proprietary cloud platform, no complicated network setup.
