How to change the resolution and frame rate of devices?

- 1. Turn on the ADVR/NVR and the AHC/IPC, and connect the AHD/IPC to ADVR/NVR.
- 2. Then go to Main Menu -> System -> Encode.

JF TECH	Record	Ev) ent	System	Advanced	Info
General	Channel	1				
2 Encode	Compression	H.265		Extra Stream1	×	
	Resolution	1080P		D1	T	
Network	Frame Rate(FPS)	30		6	•	
NetService	Bit Rate Type	VBR		VBR	Ŧ	
-	Quality	high		low	T	
	Bit Rate(Kb/S)	2662	v	202	Ŧ	
□ R\$232	I Frame Interval	2	w.	2	v	
PTZ Config	Video/Audio Smart Encode	H.265+				
O Tour						
स्त XVI settings	Remote Preview	Set				
			A	dvanced OK	Cancel	Apply

3. Choose the channel which you want to change the resolution, frame rate or other settings. Then you can change the settings of resolution, frame rate and so on. After that, you can click "OK" to confirm the change.

In addition, if the device which you want to change the resolution and frame rate is IPC, you also can go to the webside and login the IPC. Then you can change the settings of IPC on the web, the way is similiar with local GUI.
